**THE EXHIBITION OF TECHNOLOGIES AND
EQUIPMENT FOR CLEANUP, SOIL AND
WATER RESTORATION IN UKRAINE.**

40-B, Beresteysky Avenue, Kyiv, Ukraine

Recovery starts with us.
Act now! Only action changes the future.

THE EXHIBITION PROGRAM INCLUDES:

Two-day exposition area

Thematic forums

Demo ground and test drives *

*At the request of the exhibitors. The offer is provided separately

THEMATIC AREAS OF THE EXHIBITION

Dismantling.
Cleaning of territories.
Waste management
from destruction

Restoration and
improving the quality of
of soils. Revival

Restoration of water
resources in Ukraine

Cleanup of territories and restoration of water and soil resources is an extremely important task for ensuring sustainable development and ecosystem health.

These measures are prioritized for the short-term perspective and further existence for the population of Ukraine, because it is primarily about public safety, the environment and general welfare of citizens.

TO BE IMPORTANT! WHY?

- A MEETING OF LEADERS WHO WANT TO MAKE CHANGES
- THEMATIC AREAS OF THE EXHIBITION PRIORITIZED FOR FUTURE RECONSTRUCTION
- AN OFFLINE PLATFORM FOR DEMONSTRATING TECHNOLOGICAL CAPABILITIES
- THE POSSIBILITY OF PERSONAL MEETINGS AND NEGOTIATIONS WITH EXPERTS REPRESENTING VARIOUS INDUSTRIES
- RELEVANT CONTENT FROM MARKET EXPERTS
- DEMO GROUND AND TEST DRIVES ON THE LARGEST DEMONSTRATION WITH THE USE OF SPECIAL MACHINERY, EQUIPMENT AND MATERIALS

WE CREATE
A PLATFORM FOR YOUR
OPPORTUNITIES!

EXHIBITION AREA / RELEVANT CONTENT
DEMO GROUND AND TEST DRIVES

DESTROYED CITIES AND TOWNS, MUTILATED
INFRASTRUCTURE AND DESTROYED HOUSING
ARE THE CONSEQUENCES OF MILITARY AGGRESSION.
THESE ARE THOUSANDS OF TONS OF WASTE FROM
OF DESTRUCTION.

Dismantling. Cleaning of territories. Waste management from destruction

The issues of territory cleanup, dismantling and waste management are realities of today, both at the state level and at the level of the vast majority of business enterprises and, in fact, every citizen living in Ukraine, especially in the frontline and de-occupied territories.

The Exhibition "Resource Recovery", one of the thematic areas of which is "Dismantling. Clearance of territories. Waste management from destruction" is designed to become an effective platform for demonstration of special machinery, equipment and materials. Effective solutions and technological capabilities of domestic and international companies is a unique opportunity to get practical recommendations from the leaders of the industry segment.

VISITORS

- Representatives of public and private enterprises of various industries (industrial and manufacturing, food industry)
- Owners and directors of construction companies
- Representatives of legislative and executive authorities
- Mayors and heads of local communities,
- Representatives of regional, state and military administrations
- Utility companies and heads of condominiums
- Contractors and service companies

EQUIPMENT AND INSTALLATIONS, USED DURING DISMANTLING WORKS

(excavators, bulldozers, loaders, hydraulic hammers))

•SPECIALIZED TECHNOLOGIES FOR DISMANTLING OPERATIONS AND SYSTEMS FOR BLASTING SYSTEMS.

•PRECISION DISMANTLING TECHNOLOGIES:
(crane systems: hydraulic cranes, crane manipulators, cranes)

•TRACTORS FOR GENTLE DISMANTLING

EQUIPMENT AND TECHNOLOGIES FOR WASTE COLLECTION, ACCOUNTING, AND RECYCLING, WASTE UTILIZATION

•SORTING EQUIPMENT:

(conveyors for sorting waste by types, vibrating sorting machines, magnetic separators)

-PRESSES FOR PACKAGING:

(hydraulic presses, balers for presses for pressing paper, cardboard and plastic)

-DESTRUCTIVE WORKS AND THEIR

RECORDING (drones)

-PROCESSING PLANTS:

(for processing concrete and stone, shredders for processing organic materials, machines for metal shredding and processing)

SPECIAL MACHINERY AND EQUIPMENT FOR LANDFILLS AND WASTE DUMPS

(sewage machines, sludge suction machines machines, canal washing machines)

WE DISMANTLE AND
WE WILL REBUILD!

THOUSANDS OF HECTARES OF LAND ARE UNSUITABLE FOR AGRICULTURAL USE DUE TO THE HUGE NUMBER OF SINKHOLES AND TONS OF SCRAP METAL, POLLUTION WITH HEAVY METALS AND CHEMICALS. IN ADDITION TO MECHANICAL DEFORMATION, THERE ARE ALSO TOXIC ELEMENTS THAT ARE RELEASED INTO THE SOIL.

Restoring and improving soil quality. Revival

Soil restoration is a critical task both at the state level and at the level of the vast majority of business enterprises and, indeed, every citizen living in Ukraine, as it has a direct impact on food security, the environment and sustainable economic development.

The Resource Recovery exhibition, one of the thematic areas of which is Soil Restoration and Revitalization, is intended to become an effective platform for demonstrating the

Participation in the exhibition is a unique opportunity to be represented among the leaders of the industry segment.

VISITORS

- Representatives of public and private enterprises of various industries (industrial and manufacturing, food industry)
- Representatives of legislative and executive authorities
- Mayors and heads of territorial communities, representatives of representatives of regional, state and military administrations
- Agricultural holdings and farms
- Forestry and fisheries

RECLAMATION

- BULLDOZERS
- EXCAVATORS
- COMPACTORS
- SPECIALIZED EQUIPMENT
(TRUCKS, DUMP TRUCKS, TRACTORS)
- GRADERS
- WATER PUMPS

WATER DRAINAGE AND DRAINAGE EQUIPMENT

- PIPELINE EQUIPMENT
- CRUSHERS
- SIEVES FOR SORTING MATERIALS
- CULTIVATORS
- MULCHERS
- LIFTS FOR MATERIAL REMOVAL
- ROLLERS FOR SOIL COMPACTION
- DRAINAGE AND DRAINAGE EQUIPMENT

SOIL ANALYZERS BIOREMEDIATION LAND RECLAMATION TECHNOLOGIES

REVIVING THE SOIL -
REVIVING LIFE!

MILITARY OPERATIONS HAVE A NEGATIVE IMPACT ON THE QUALITY OF WATER RESOURCES. POLLUTION WITH CHEMICALS AS A RESULT OF HOSTILITIES THAT GET INTO WATER BODIES, DESTRUCTION OF INFRASTRUCTURE (WATER TREATMENT FACILITIES, WATER SUPPLY AND SEWERAGE SYSTEMS) LEADS TO UNTREATED WASTEWATER ENTERING NATURAL WATER BODIES

Restoration of water resources in Ukraine

Restoration of water resources is a critically important direction both at the state level and at the level of and the vast majority of business enterprises, and indeed every citizen living in Ukraine.

The exhibition "Restoration of Resources", one of the thematic areas of which of which is "Restoration of water resources of Ukraine" is intended to become an effective platform for demonstration of special equipment, equipment and technologies of domestic and international companies.

Participation in the exhibition is a unique opportunity to be represented among the leaders of the industry segment

VISITORS

- Representatives of public and private enterprises from various industries (industrial and manufacturing, hydropower, food industry)
- Representatives of legislative and executive authorities
- Contractors and service companies

- Mayors and heads of local communities, representatives of regional, state and military administrations
- Utility companies and heads of condominiums
- Forestry and fisheries, farms
- Agricultural holdings

- WATER TREATMENT TECHNOLOGIES
- FILTRATION
- AERATION
- COAGULATION AND FLOCCULATION

- ULTRAFILTRATION AND REVERSE OSMOSIS
- ULTRASONIC TECHNOLOGY

- PHYTOSANITATION
- OXIDANTS
- SLUDGE REMOVAL TECHNOLOGIES

LET'S PROTECT WATER RESOURCES FOR FUTURE GENERATIONS!

The exhibition is designed to create an effective platform for demonstration of modern solutions and technologies from leading European and domestic companies.

TAKE ADVANTAGE OF THIS OPPORTUNITY - BECOME A PARTICIPANT OF THE INDUSTRY EVENT!

EQUIPPED AREA: 3800 UAH/m²

- Carpeted flooring
- Power supply and lighting
- Company name on the frieze
- Furniture (depending on the size of the stand)
- Security at night

UNEQUIPPED AREA: 2800 UAH/m² (from 6m²)

- Rent of the area
- Security at night

AREA ON THE STREET : 1200 UAH/m²

- Rent of the area
- Security at night

Registration fee - UAH 6000 (price includes VAT)

Venue: «ACCO International Exhibition Center», 40-B, Beresteysky Avenue, Kyiv
